

Program delivery

Students have a two-hour session of on-site instruction each week during teaching weeks and two hours of programmed off-site work per week, supported by resources on www.languages.org.au and class forums on Google Classroom.

Teaching spaces are hired as required. Venues are designated as teaching centres of the academy.

Students are provided with a semester unit outline, a term-by-term overview and a weekly module that outlines the week's learning goals, learning resources, activities to do on-site and activities to do off-site.

The Canberra Academy of Languages maintains regular communication with day schools.

In the longer term, we will explore the possibility of offering fully online programs along the lines of those in some other jurisdictions, to accommodate the needs of students following the ACT curriculum who are out of commuting reach of the teaching centres.

A specialist facility for Canberra

The Canberra Academy of Languages is a specialist not-for-profit facility for language learning in the Canberra region, with a focus on global engagement and local connections.

Canberra as the national capital should promote engagement with the global community and should foster the capacity of our citizens to participate effectively in that community.

As a major centre, the city should also foster and extend learning opportunities reflecting the presence of groups within the local region.

The Canberra Academy of Languages contributes to these goals, complementing other avenues for language learning in the ACT.
